
Kareem Ashouri

Backend Developer + Content Creator

Backend-focused developer with hands-on experience building secure and scalable database-driven applications. Also a content creator with a strong track record of growing audiences and generating millions of views.

Work Experience

Backend Developer (Team Project)

CSUN Chat Application

Summer 2025

Developed the backend for a chat application exclusively for CSUN students, enabling real-time messaging through authenticated CSUN email accounts. Built and integrated the backend using Node.js and MongoDB.

- Implemented MongoDB schemas for users and message storage
- Integrated backend logic with front-end JavaScript
- Ensured secure login using CSUN email verification
- Tested and optimized database queries for performance

Developer

Senior Project

2025 - Present

a Unity-based game, focusing on authentication, networking stability, and secure server integration.

- Deployed the backend using postgresql
- Integrated Unity client with self-hosted Nakama server
- Implemented Supabase authentication (login, registration, password reset)
- Used ngrok for tunneling, later migrated to Tailscale VPN for stability
- Tested multiplayer functionality across multiple machines

Content Creator

YouTube & TikTok

2024 – Present

Built and scaled multiple YouTube and TikTok channels, these channels varied from educationl content to physics simulations, consistently generating millions of views and engaging a wide audience.

- Generated over **8+ million views** on a single video
- Accumulated over **+20 million** views a month across different platforms
- Scripted, edited, and published high-retention short-form and long-form videos
- Analyzed audience retention graphs and optimized hooks for higher engagement
- Developed strong understanding of algorithm-driven growth strategies
- Managed branding, thumbnails, titles, and analytics tracking

Education

California State Northridge, 2024 - 2026

B.S. in Computer Science
